

Junior Warden's Report 2020

Listed are most of the projects that have been attended to over the last year or so:

Church fire extinguishers refreshed

Emergency exit lighting refreshed*

Exterior Lighting enhanced*

Front stained glass window once again shines out at night*

Kitchen exhaust fan addressed*

Front awning replaced

Continuation of Felicia Martineau's work to clean out the Church

Continuation and completion of Marjorie Strong's work to get Church driveway repaved

Addressed a mold problem in the undercroft

The total cost for these projects exceeded \$11,000.00. I wish I kept the email I received from our Senior Warden to share with you- it was great and brings a smile to my face thinking about it. Without using the exact words, he said: Bill cool your jets with the spending.

I met Earl at the rectory in mid August to review the driveway challenge and saw the rectory for the first time. I fell in love with it. The rectory is in pretty good shape and Earl and Elizabeth have been Very good stewards of the property. The rectory does need help and I feel we need to do work on it in the very near future.

The * means Leo Martineau. Leo has done a lot for the church this year in addition to the items listed and we all owe him a debt of gratitude.

After spending time with Earl on these projects I am convinced he has a blue tee shirt on under his street clothes with a big golden S on the chest.

I will “flesh out” any of the projects we attended to this year if you are interested. One of the more memorable stories involves Ron Hirsch’s process of dismantling the piano in the undercroft which I think Christina would share with us.
